

# Satellite Water Monitoring System

G95000 | EAN 9414701950006

## A better view of your water

### Your reliable 'eye in the sky'

Secure and reliable satellite connection is ideal for properties where cellular or Wi-Fi reception are weak or unavailable.

### Set and forget

Easy to install and activate. Easy-to-follow instructions straight from the box ensure you are up and running in no time. The device also has a long battery life expectancy of 7+ years.

### Notify the entire team

Using the custom-built app, add multiple mobile numbers or email addresses to receive the alerts.

Protection Cover

Universal Monitor (Micro-satellite)

3 meter Liquid Level Sensor

Cable Management Mounting Base

FIRST YEAR SUBSCRIPTION INCLUDED

Gallagher Liquid Monitoring App

Note: First year subscription is included with the purchase of the device. An active satellite connection is required to use the device and fees will apply after the first year. This system is not compatible with other Gallagher Water Monitoring Systems. IMPORTANT: The information presented in this document is valid at the time of printing and may change without notice. Visit [am.gallagher.com](http://am.gallagher.com) for the latest information on Gallagher Water Monitoring Systems.

# Satellite Water Monitoring System

G95000 | EAN 9414701950006

## Benefits

### Your reliable 'eye in the sky'

Secure and reliable satellite connection is ideal for properties where cellular or Wi-Fi communications are weak or unavailable.

### Tank level monitoring your way

Get alerted to low and high levels. Customise your alerts and find out if levels are dropping faster than expected, allowing you to intervene when an issue is identified.

### Notify the entire team

Add multiple mobile numbers or email addresses to receive the alerts.

### Monitor as many tanks as you need

The app can monitor multiple tanks - simply install a device to each tank and activate using the same account.

### Engineered for ruggedness and reliability.

The device is fully waterproof and covered to protect against pests and the environment. Operates between -40°C to +80°C.

### Save time and money by reducing unnecessary water runs

Check the app on your phone for tank levels and know exactly how much water you have available.

## How it works

This system uses low-power and secure satellite connection to capture tank level information and sends it to your phone via text or email alerts.

As a satellite orbits the earth and passes over your device, it will collect four (4) "reads" a day, and will send the data to the cloud (and on your phone) up to four (4) times per day.

On your app, you'll then see your tank level data that was captured when the satellite passed over and collected a "read".

First year subscription is included with the purchase of the device. An active satellite connection is required to use the device and fees will apply after the first year. Talk to your Territory Manager to find out more.

## Enhance your system with the Water Flow Indicators.\*

Install in water lines to visually check for abnormal water flow and find leaks easier.

\*Sold separately
