

Slugger Mix

Effective molluscicide

Slugger Mix is a 50/50 mix of Sulgger Pellets, produced by **Dry Pelletising** and Slugger Prima, produced by **Wet Extruded** process.

The combination of the two products has the following benefits compared to regular pellets:

- Cost effective control
- Longer lifespan of product due to better weather resistance and robust qualities of Wet Extruded Pellets
- More baits per Ha and higher density in bait distribution leading to more effective snail control.

The double active ingredient formulation with 10g/kg **metaldehyde** and 5g/kg **methiocarb** will control **snails and slugs** including the **Dune Snail (Theba Pisana)**

Use Mix For Better Protection

- High quality ingredients
- Weather resistant up to 21 days
- Highly palatable
- Dual active ingredient providing control of snails, slugs and Dune Snail (Theba Pisana)
- Small Pellets size providing more baits per Ha and even distribution

Specifications

Appearance	Green pellets
Average Bait Size Pellets	2.2mm diam, 4 - 5 mm long
Average Bait Size Wet extruded	2.2mm diam, 2.2 mm long
Baits/kg	More than 75 000
Metaldehyde Content	10g/kg
Methiocarb Content	5g/kg
Available Pack Size	25kg 500kg 1 000kg
Process	Dry pelletising & Wet Extrusion
Shelf Life	2 years
