

E-SUPPORT OPTIONS

Get the most out of your AquaCheck equipment

with the E-Support Subscription Service which aims to provide not only professional assistance during the initial setup stages of the equipment, but can also give you access to expert insights from a qualified agronomist throughout the growing season.

We have two E-Support options to suit your needs:

E-Support

Full support throughout the growing season.

Overview

Comprehensive technical and agronomic support is provided with the main focus being on the correct agronomic interpretation of the data.

Professional Insights

With the aid of a qualified agronomist, insights are provided to aspects such as irrigation scheduling status, irrigation depth, irrigation efficiency, crop growth, root activity and much more.

Technical Setup & Reporting

- Review quality of new probe installations.
- Initial probe setup within ACWEB Software program.
- Root Zones for the top and bottom soil layers.
- Setting the upper and lower management lines.
- Cultivar Lines for detailed management during different growth stages.
- 8 comprehensive reports via email.
