

	R20	R30
Length	1700 mm	1700 mm
Width	775 mm	1050 mm
Height	1200 mm	1850 mm
Weight without gas cylinders	490 kg	510 kg
Maximum capacity	0,7 to 1 ha	1 ha
Average gas consumption	13-15 kg/hr	13-15 kg/hr
Gas installation	Support for 5 or 10 cylinders	

The Frostguard was specifically developed to protect vineyards, orchards, and plants in tunnels from night frost. It also improves fruit set. Unlike the Frostbuster the Frostguard is a stationary machine that can be fitted with an auto-start system. When the temperature drops below the predetermined level, the system starts the engine, ignites the burner, and controls the temperature automatically.

On the Frostguard both the burner and fan are fueled by propane gas - butane and LPG cannot be used as it will freeze if temperatures drop too low. The Frostguard system allows you to start with one or two machines, and then to expand on this in future.
