

PRODUCT DATASHEET

GENERAL

An aqueous solution of organic acids that acidifies the drinking water, reducing biofilm build-up, improving gut health, and firming manure droppings. For use in poultry, pigs, ostriches, and pigeons.

MODE OF ACTION

Acidifies the drinking water and crop to a pH below 4. Pathogenic bacteria, such as Salmonella and E. coli growth, are inhibited at this pH range, leading to a reduction of pathogenic bacteria and an increased proportion of 'good' bacteria. The improved gut bacteria composition will lead to improved digestion, absorption, and manure quality. Early acidification for the first three days after hatching will prevent Salmonella colonization in the gut. Gut acidification may also assist in preventing foot burn due to excess nitrogen in 'warm' diets..

MAIN INGREDIENTS

Acetic Acid,
Lactic Acid.

SPECIFICATION

Colour: Red
pH: <2,5 with a special

DIRECTIONS FOR USE

Use only as directed, in consultation with a registered nutritionist. Do not overdose and use within prescribed levels.

Mix 5 L Gutpro® per 1000 L of drinking water and dose from a minimum of 8 hours per day. Ensure that the pH of the drinking water is between pH 3,5 - 4,5 after the addition of Gutpro®.

- Broilers:** Treat for 3 – 5 days consecutively.
- Layers / Breeders:** Treat for 3 – 5 days, before and after the transfer of point of lays.
For Adults, Treat at least 3 times a week.
- Post-antibiotics use:** Treat for 3 – 5 days consecutively, after antibiotic treatment has stopped.

WARNINGS

Gutpro® is mildly corrosive. Keep out of reach of children, uninformed persons, and animals. Use proper protective clothing such as rubber gloves, an apron, and eye splash protection when handling the product.

HANDLING AND STORAGE

Store Gutpro® in a cool, dry, well-ventilated area, away from direct sunlight and heat sources. Maintain storage temperatures between 5 °C and 40 °C, and always keep the container tightly closed when not in use. Do not smoke while handling the product, and wash hands thoroughly afterward. The expiry date printed on the label is only valid if storage conditions are properly observed. For full safety and emergency procedures, refer to the Safety Data Sheet (MSDS).

PACKAGING

1 Litre, 5 Litre and 25 Litre
