# Gallagher Wireless Monitoring System Series 2

## Water system information in your pocket.

View water usage, tank levels, automatically control pumps and receive notifications on your phone, via the free Gallagher Water mobile app\*

\*Water mobile app subscription fee applies for monitoring more than 1 water tank and pump controller

**Data Transmitter and Touch Screen Receiver are included in the Starter Kit.**

## Early warning of abnormal water usage.

Monitor and receive alerts when tank levels drop or water consumption unexpectedly changes.\*

\*Subscription fee applies for push notifications.

Long range communication with up to 10km of connectivity range.

With uninterrupted line of sight between the Data Transmitter and the Touch Screen Receiver, data can be sent up to 10kms across your farm.

# How it works

Subscription fee applies to receive push notifications, to monitor more than 1 water tank and pump controller on your mobile phone, and to share your tank level information to other users.

## Expand your system

Monitor up to 9 water tanks and control up to 2 water pumps across your farm with additional expansion kits and Pump Controllers.
