

MICRON

Undavina

Designed for weed control in vineyards and orchards, the Undavina rolls closely around the base of plants to ensure maximum weed kill. Its flexible structure is ideal for weed control around young plants where it should be used with the vinyl cover to protect the sensitive stems from spray damage.

H-frame options are available.

Model	Spray Width	Flow rate	Weight
400 HiFlo	400 mm	100 – 500 l/ha	17 kg
400 CDA	400 mm	18 – 20 l/ha	17 kg
