

## Features & Benefits

**AIR-PRO® METER** This simple, positive air pressure meter offers superior seed singulation and achieves uniform spacing by "dead-dropping" seed into the patented Clear-Shot® seed tube. Gentle on seeds and requires almost zero maintenance.

**POSITIVE AIR SYSTEM** – hydraulic fan provides positive air pressure to meter seeds.

**56,4 liter POLY HOPPERS** - Poly seed boxes provide consistent gravity feed to Air-Pro® meters.

### MORE ABOUT THE 4 - 10 ROW YIELD PLANTER:

The smaller Yield-Pro® planters from Great Plains do not mean less advanced or less efficient. The yield-enhancing technology of our larger planters, the Positive Air-Pro® metering system, which brings a new level of spacing and accurate seed placement to these compact planters.

Additional versatility is that the smaller Yield-Pro planters can be equipped to plant either standard single rows or the ingenious Twin Row design on the 76, 91, 97, or 102 cm spacing. The 25 series drive unit is accurate, durable and easy to maintain. A hydraulic fan provides positive air pressure to the Air-Pro® gauges for exceptional accuracy.

**20" Heavy duty Fertilizer Coulter.** Independent coulter and tine Fertilizer placement - Each on their own spring loaded arm. Ensures uniform Fertilizer placement.

**ROW MARKERS** – Optional hydraulic row markers are built tough and feature scalloped disks.
