App available from App Store or Google Play.

# MBS6500i Multi Powered i Series Energizer

All the smarts of the i Series Energizer System with the ability to power your fence your way - Mains, battery, battery backup or solar.

## Benefits

### Peace of mind with advanced monitoring and remote technology

When bundled with the i Series accessories, the system provides 24/7 remote monitoring and control. The Energizer Controller provides real-time information about your fence performance, alerts you of fence faults and allows you turn your fence on and off.

Replace your controller with an i Series App Gateway to connect to the Gallagher Ag Devices mobile app via Bluetooth or WiFi connectivity.

### Power your fence, your way

Mains, battery or solar. Energizer comes complete with a mains and battery lead set for all power source options (battery and solar panel sold separately for battery and solar powered solutions)

### Maintaining fence voltage right to the back paddock.

Smart adaptive electronics are constantly monitoring the performance of your fence. Adjusting the output energy based on changes fence conditions to maintain voltage passed fence faults.

### View energizer and fence performance data from a convenient location.

The i Series Energizer Controller shows your fence performance information in a convenient, separate display that can be located outdoors up to \*50m away from the Energizer

\*Three metre cable provided. Extend up to 50m with additional RJ12 cable or up to 200m with special low resistance cable.

## i Series Comms Pack

G51002

Remote control and 24/7 monitoring of your fence performance

## i Series App Gateway

G56703

Provides real-time information about your fence performance, alerts you of fence faults and allows you to turn your fence on and off – giving you a better view of your fence

### Save hours searching for and repairing faults.

Be led directly to the location of fence faults, turn the Energizer off remotely to allow for a safe and convenient repair then turn the power back on – all without needing to return to the Energizer.

### Create fence zones and monitor fence performance out on the farm.

Install up to six monitors on your fence line to measure performance in specific areas of your farm. Information is displayed on your Energizer Controller, Remote and Ag Devices mobile app.

### Experience the peace of mind of phone-based fence monitoring and real-time fault notifications by enabling communication between your i Series Energizer and the Gallagher Ag Devices mobile app.

An optional accessory that replaces your Energizer Controller to connect your energizer to mobile phone.

- Be alerted of fence faults before they become a crisis
- Monitor different zones and particular areas of your fence system
- Remote control of your Energizer
- View 24-hour fence performance history
