

SHAKE WELL BEFORE USE

bontera[®]

Richer earth. Better harvest.

BREAKDOWN

BIODEGRADATION - BIOREMEDIATION - COMPOSTING

Multi-purpose bioformulation containing a consortium of superior aerobic and anaerobic bacteria selected for their ability to degrade organic material

Bontera[®] BREAKDOWN is a microbial consortium with superior enzyme performance and multiple fields of application.

It is effective in breaking down organic plant and animal materials, accelerates composting processes.

- Contains a stable consortium of microbial spores
- Works under aerobic and anaerobic conditions
- Produces multiple enzymes to degrade a wide range of organic materials.

Storage and Handling: Store in closed containers at 10C - 40C. Wash hands thoroughly with warm, soapy water after contact. Avoid eye contact. If product comes into contact with the skin rinse thoroughly with plenty of water. Seek medical attention if required.

-  **Composting Accelerator**
-  **Degrades Crop Residue**
-  **Breaks Down Manure**

RECOMMENDED APPLICATION RATES:

COMPOST	
RATE	INSTRUCTIONS
10ml per Litre	Ensure that material is in pieces less than 15cm in size. Wet the compost with the dilution as the compost heap is being layered. Turn the heap and re-apply product every 2 weeks. Compost should be ready in approximately 6 weeks.
DAMS	
INSTRUCTIONS	
Add 50 - 100L of product per Megaliter of water monthly, or as needed.	
MANURE	
RATE	INSTRUCTIONS
100ml per Litre	Spray the diluted product over the manure daily, ensure that the surface is wet after spraying.
