

Sparex Micro Bright™ Beacons – A Step Above the Rest!

Don't let their small size fool you, our [Micro Bright™ beacons](#) are two of the most compact, light, and durable warning beacons available in the market

Sparex is renowned for industry leading product innovations and our commitment to improving agricultural operations in every aspect. Looking at our new, super compact, amber Micro Bright™ warning beacons, you can see why!

[S.167701 Micro Bright™ Beacon, Magnetic, 12V](#)

[S.167700 Micro Bright™ Beacon, Flexible Pin, 12V](#)

What makes Sparex Micro Bright™ beacons better than the rest?

- **Super compact** – with protected compact lens; reducing likelihood of coming in to contact with branches and other obstacles
- Modern, **bright light** – single flash function with **36 LEDs**
- **Suitable for all tractors running off a 12V system**
- **Easy to fit** – fits in a matter of minutes and **easy to transfer between vehicles**
- **Incorporates patented BoardFree technology** – providing improved product efficiency and enhanced product durability (**superior water, shock, corrosion, and impact resistance**)
- **Extremely robust** – thanks to their solid, over moulded construction. They are also **completely sealed and waterproof (IP67)**
- Reliable, high performance - **ECE Reg 65, Reg 10**
- Modern, sleek design – instantly upgrades machine appearance

How durable are they? [Watch this video.](#)

About Sparex:
