

Features & Benefits

The Ombu sunflower header demands the minimum of combine power and diesel. Its mechanism is easily turned by hand.

Large pans prevent any crop loss.

Fits onto any combine harvester

MORE ABOUT THE OMBU SUNFLOWER HEADER:

Agri Afrika's Ombu sunflower header from Argentina is tough, strong and durable, the Sunflower header turns particularly light so that no harvester power or diesel is wasted.

The header can be mounted on any harvester and all its adjustments are made quick and easily.

At a harvester speed of 10km/h, the Ombu glides through the fields without packing. The cleaning flaps on the teeth of the Sunflower header ensures that not a single sunflower is lost.

The Ombu maintenance requires little time and effort. In addition to the normal daily inspection, there are some nipples that need to be greased every 50 hrs.

MODEL	WORKING WIDTH m/ft	NUMBER OF ROWS	HEADER TRAILER OPTION	HYDRAULIC CHECK PLATE	FEED ROLLERS
8 ry .76m	6,08m/20ft	8	Optional	Standard	Standard
