

APOLLO

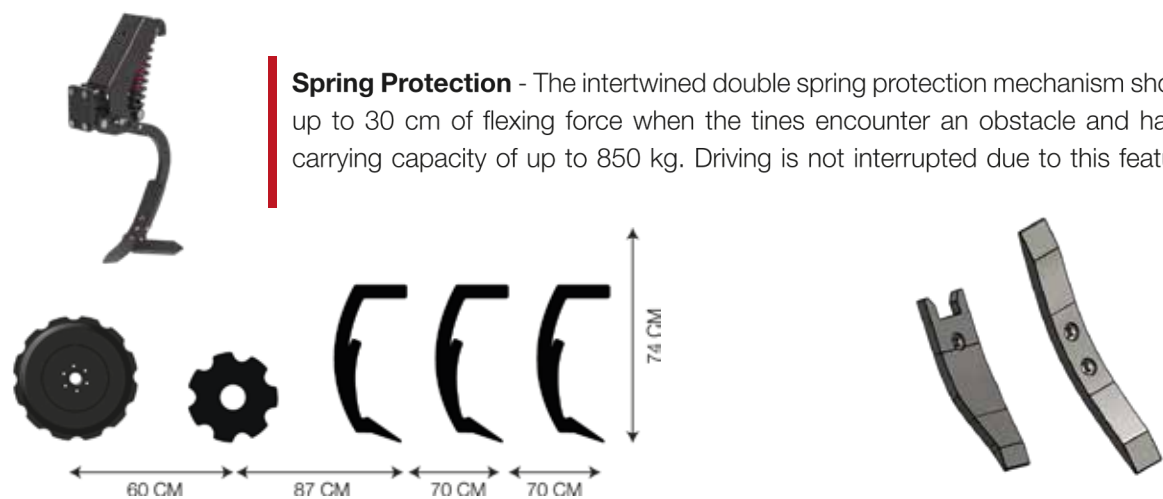

Stubble Combined Cultivator

APOLLO MR (Mounted - Rigid)
 APOLLO MF (Mounted - Foldable)
 APOLLO TF (Trailed - Foldable)

Perfect cultivation, leveling, and compacting at the same time. Apollo cultivator is suitable for working under heavy conditions with its strong structure. You can perform modern soil cultivation with Apollo, with its tines and points designed with ideal angles and quality for shallow or deep cultivation without overturning the soil. With the Apollo cultivator, you not only cultivate the soil, but also perform leveling and compacting operations in one go. The soil cultivated with Apollo receives more air without damaging its natural structure and its organic fertilizer production and water permeability increases.

Two Options for Damage-Free Driving - Apollo has a design suitable for operation even in challenging conditions. Its structure suitable for shallow and deep processing is equipped with protection mechanisms that allow it to continue smoothly without damaging the tines or interrupting the ride when encountering an obstacle while driving. By that, drivers have a comfortable driving experience and prevents the need for parts replacement. It offers two different options depending on demand and need.

Three Rows of Tines with Great Clearance

Different tine Points for Different Purposes
