

Drifos P12

Reg. Nr. V35078 Wet 36/1947

ECOVITE DRIFOS P12 is a weather resistant phosphate concentrate produced by blending ECOVITE DRIMOL, high quality monocalcium phosphate, minerals and trace minerals.

ECOVITE DRIFOS P12 is a versatile product and can be used as a phosphorous source in all farm animal diets.

ECOVITE DRIFOS P12

- Supplies phosphorous in the form of highly available monocalcium phosphate (MCP).
- Contains other macro minerals and has a low calcium to phosphate ratio.
- Includes a balanced range of essential trace minerals.

ECOVITE DRIFOS P12

- Is a concentrate and needs to be mixed with other ingredients.
- When mixed with equal parts of salt, it forms a weather-resistant phosphate lick containing 6%P.
- Forms a seal when in contact with moisture that protects the supplement against rain damage and losses.

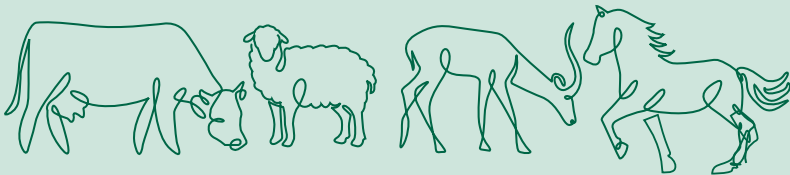

- Is highly palatable, thus ensuring adequate intakes.
- The P6 blend can be converted to a phosphate block by adding 10% water when blending.

ECOVITE DRIFOS P12

- Is easy to handle in 25 kg PPPE bags.
- Has a 24 month shelf-life.
- Is safe to feed to horses, goats and game.
- Is free of NPN sources like Urea.
- Do not contain growth promotors or other medication.

Feeding recommendations

- Mix 2 x 25 kg **ECOVITE DRIFOS P12** with 1 x 50 kg feed salt to obtain a P6 lick.
- Recommended intakes of the P6 lick:
Cattle 100/200 g / animal / day
Sheep 17 - 34 g / animal / day
- Contact and agent or distributor for further applications and formulations.
