

REDSTRIPE IMPACT WRENCH ASSR 20 - 3/4

The powerful 20V brushless impact wrench is designed for heavy-duty fastening and bolt-busting tasks. It provides an excellent balance of power and control within a durable structure, making it perfect for automotive, cargo, structural assembly, and mechanical maintenance applications.

Voltage	20V
Tool holding device	3/4" external drive
Maximum torque Fastening	1500Nm
Maximum torque Nut-Busting	1900Nm
No load speed	0~900/1100/1900 min
Impact rate	0~1000/1600/2000 bpm
Suitable screw	M12-M30
Machine weight (bare tool)	3.2 kg

BRUSHLESS MOTOR

NEW

- Compact design, longer motor life, and increased runtime for reliable, efficient operation.
- High Torque Output: Designed for demanding fasteners with nut-busting torque capacity.
- Mega Power / Constant Torque System: Prevents battery overload and overheating, while maintaining torque under load.
- Durable Construction: Reinforced housing and high-strength gears ensure long-lasting reliability.
- The built-in LED light is perfect for working in dark or poorly lit areas.
- All REDSTRIPE machines are compatible only with RED STRIPE batteries

ADVANTAGES

- 4 Mode Selections: Three-speed plus Auto Stop settings provide the right amount of power for various fastening tasks.
- Auto Stop Function: Automatically stops rotation after loosening bolts, reducing work time and conserving battery power.
- **Torque Surge Technology:** Delivers wave-like torque bursts for rapid acceleration and responsive control, rather than just raw top speed, to effortlessly handle heavy loads and make quick starts.

APPLICATIONS

Removal and installation of heavy-duty bolts and nuts in automotive repair.
 Assembly of structures requiring strong fastening techniques.
 Maintenance of mechanical equipment and tools.
 Working with standard and high-strength bolts in construction and industrial applications

USAGE RESTRICTIONS

Do not expose power tools to rain or wet conditions. Water entering a power tool will increase the risk of electric shock.
 Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust.
 Avoid over-tightening screws to prevent stripping.

STORAGE CONDITION

The recommended storage temperature of tools and battery is from 0°C to 45°C
 Battery Storage:
 - Remove batteries from the tool when not in use.
 - Store partially charged batteries (around 40- 60%) for long-term storage.
 - Avoid contact with metal objects to prevent short circuits.

CROSS SELLING

Impact Sockets
 Socket adapters and extensions
 Tool bags or cases
