

# BMV

## BT600L

BMV's forest cutting bars can fit both saw blades with WIDIA teeth  $\varnothing$  600-750 mm. for a drastic pruning and special knives for a better trim of the tree. The drive is done by poly-v belt. The motor has 60 l/min absorption. According to the different necessities the bars can have 2, 3, 4, 5 or 6 cutting groups.
