

## Features & Benefits

**TELESCOPING TONGUE** - The telescoping tongue puts the planter closer to the tractor in field position, allowing tighter turning on end rows.

**FERTILIZER CARTS (OPTIONAL)** – Choose from three different optional fertilizer carts, available in 2 273, 3 341, or 4 546 litre (shown) configurations. All carts are 2-point mounted for excellent handling.

**BULK SEED BOXES** – Spacious poly hoppers drastically cut down refilling time.

18,3 m machine folds to a narrow 4,3 m wide

Multiple row spacing options

Bulk seed with either two seed company bulk boxes or two 5 740ℓ poly hoppers to increase planting time and decrease fill time

Telescopic tongue keeps the machine close to the tractor in field position, but allows the wings to fold to the front for narrow transport

Heavy-duty skid steer tyres for BT maize stubble and excellent flotation

### MORE ABOUT THE 24-ROW YIELD-PRO® -PLATER:

Ideal for large operations, the Great Plains PL5905 18 meter bulk-fill planter offers a new level of durability, reliability, and practical technology. With versatile 76cm and 38cm row spacings, the PL5905 excels at planting traditional crops like soybeans and corn, as well as alternative seeds such as hemp and canola.

The PL5905 features new 05 Series row units with larger pivot bushings and a durable parallel arm system, Air-Pro® meters for optimal seed singulation, and IRC electric drive for variable-rate seeding and more. Advanced options like the AccuShot™ in-row fertilizer system and Ag Leader's SureForce™ hydraulic downforce technology further enhance performance to help ensure seeds get off to the right start.

SPECIFICATIONS	
<b>MODEL</b>	<b>PL5905</b>
<b>ROW UNITS - ROW SPACING</b>	48 - TR 76 cm; 47 - 38 cm; 24 - 76cm
<b>TYRE SIZE</b>	15-19S NHS 12 ply
<b>REQUIRED KW</b>	209 - 328
DIMENSIONS	
<b>WORKING WIDTH (NO MARKERS)</b>	18 m
<b>MARKERS WIDTH</b>	18 m
<b>TRANSPORT WIDTH</b>	4,1 m
<b>TRANSPORT LENGTH</b>	11 m
<b>TRANSPORT CLEARANCE</b>	558 m
<b>TRANSPORT HEIGHT</b>	3,8 m
